“ WOOD WIPE ”

FOR THE REJUVENATION OF WOODEN FOOD SERVING ITEMS SUCH AS CHOPPING BOARDS, BUTCHERS BLOCKS, PLATTERS, BOWLS, SPATULAS, HANDLES & ALL WOODEN KITCHEN UTENSILS

Since the beginning of man wood has been shaped into utensils, bowls & chopping blocks.

Wood is practical, easily shaped and less likely to feed and hold bacteria. However, constant washing of wood has a tendency to soften the surface tissue and raise the fibres of the timber. Therefore, it is necessary to regularly nourish or feed the timber to prevent against the above.

Many oils used today by the home owner like olive oil, mineral oils and cooking oils are classified as non-drying oils and can promote mould growth, gradual darkening of the timber, as well as having a sticky surface that attracts dust and dirt.

Drying oils like Tung Nut Oil cure under oxidisation (air) within the structure of the timber and are more resilient to water and alcohol and less likely to promote mould growth or go rancid.

Ecowoodoil “Wood Wipe” has been specifically formulated from a blend of Nut* & Citrus Oils to create a drying oil that will maintain Wooden items that frequently come in contact with food and water. A simple wipe on/wipe off application is all that is required to keep your timber pieces looking and feeling good.

THIS PRODUCT IS FOOD SAFE

When used according to instructions as follows:

Apply sparingly to clean dry timber. Allow to dry in a well ventilated area prior to use.

***Tung Nut Oil in this product is “cold pressed” from the seeds of the fruit of the Tung Nut Tree. These are not legumes i.e. peanuts, which are usually the cause of allergic reactions in some people. If allergies to any nuts or nut products are of concern medical advice should be sought prior to using this product.**
